

The **RN7AS Heater**

VITI HEATER VT1 (A patented process N° FR 191 13 95)

An innovative and ideal solution
For protecting crops against the risk of late frost.

✿ PRINCIPLE

Producing a triple combustion, while limiting pollutant gases.
An ecological process, with no risks for crops and the environment.
The exhaust pipe has a specific patented configuration,
designed to increase thermic exchange,
as well as combustion, for an improved heat production.

✿ FEATURES:

POWER version VITI	15 kW
POWER version ARBO	28 kW
FUEL	PELLETS
OTHER FUELS	Vine shoots, wood chips

✿ FEATURES:

VITI Version - 15 kW	200 heaters / hectare
ARBO Version - 28 kW	100 heaters / hectare
IN ADDITION TO AN ANTIFREEZE WIND MACHINE	32 heaters, according to the established heating plan
AUTONOMY	Approx. 8 hours
OPERATIONAL COST	Low, approx. 4 cents per KW/h
ENVIRONMENT	No fume discharge
+	Possible underground use
